

# Edge Analytics for Axis

- Next generation motion detection -

Reliable alarm and intrusion detection: Eliminate 95% of all false alarms

- ▶ Runs on all Axis cameras<sup>1)</sup> and video encoders<sup>1)</sup>
- ▶ Field proven: 7,500 channels connected to alarm centers
- ▶ Dramatic reduction of bandwidth and storage space usage
- ▶ Easy integration and configuration

Only €149,-

- **Adaptive Outdoor Analytics:** Ignore environmental variables like tree branches moving in the wind, rain, snow, change in lighting, reflections and moving shadows
- **3D Video-Awareness:** distinguishes between people and vehicles based on aspect ratio
- **Electronic Fence / Trip Wire:** secure a perimeter by selecting the boundaries of the areas of interest
- **Directional Detection:** alarm triggers when subjects motion in a direction
- **Sabotage Detection:** alarm triggers when view is obscured

Integrates smoothly into all Video Management Systems such as:

### Installation:

- ▶ Simple direct to camera software download
- ▶ Easily installed via IP-network from any PC
- ▶ Integrates seamlessly into Axis configuration menu and event handling
- ▶ Installs and configures in 5 minutes

### Configuration:

- ▶ Expands from Axis Web Interface
- ▶ Includes Installation Wizard

## Software-Specifications

<b>1) Supported Cameras and Video Encoders</b>	Axis 210, 210A, 211, 211A, 221, 223M, 225, 233, Axis 240- and 241-series (only 1-channel), Axis 243-series (1- and 4-channel)
<b>Video Standard</b>	IP – JPEG (Motion JPEG) MPEG2*, MPEG4*, H.264*
<b>Resolution/Image Size</b>	NTSC: 320 x 240, CIF: 352x288 VGA : 640 x 480*, 4CIF: 704x576* MegaPixel: 1.600x1.200*
<b>Frames per sec</b>	min. 2 images / sec (2 FPS) max. 25 images / sec (25 FPS)*
<b>Video Input</b>	one IP camera
<b>Viewer</b>	via 3rd party system or viasys PC-Client
<b>Recording</b>	Triggered by 3rd party systems or Axis Event-Management
<b>Compression</b>	see "Video Standard"
<b>Storage</b>	via 3rd party system
<b>Password</b>	yes
<b>Configuration</b>	via Web-Browser
<b>Selective Setting</b>	configurable indoor and outdoor sensitivity, distance in field of view, full image analysis, electronic masking, sensitivity discriminates between objects based on size
<b>Actions</b>	Triggering via TCP/IP to 3rd party system or Axis Event-Management
<b>Recording</b>	by third party systems in standard resolution and frame rate* Saves last alarm images: pre-alarm images, alarm images, protocol images

<b>Sustained Recording</b>	see Recording
<b>Display</b>	via Web Browser, viasys PC-client Software or 3rd party system  * when supported by 3 <sup>rd</sup> party system (milestone, NetAvis, SeeTec, etc.)

### Installation Program (Plugin Loader)

<b>Medium</b>	CD-ROM, Website download
<b>Operation System</b>	Microsoft Windows
<b>Installation via</b>	IP-network
<b>Remote Installation</b>	yes
<b>Trial / Activation</b>	free 30 day trial, then activation viawebsite by camera serial nr. (MAC)

## Free Trial

Please test the Plugin on your Axis-camera as a **30-days free-trial** with complete functionality which is available on the website [www.viasys-plugin.com](http://www.viasys-plugin.com).
